Re: – Developmental Screening Follow-Up

Dear Medical Provider

is currently enrolled in our early childhood program at WellKind School for Early Learners. As part of our developmental screening process, the family completed the Ages & Stages Questionnaire (ASQ-3) and/or ASQ:SE-2. Based on the results—and classroom observations—we have encouraged the family to follow up with your office for further guidance. We are not medical professionals and are not making any diagnosis. Our goal is simply to share what we've observed and ensure the family is connected with the best resources available.

Observations from the classroom:

If your office determines that further evaluation is appropriate, we are happy to collaborate or provide additional notes at the family's request. Thank you for supporting this child's healthy development.

Warmly,

Elizabeth Keiper
